Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. In view of the appeal brief filed on 14 April 2004, PROSECUTION IS HEREBY REOPENED. A new grounds of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7, 8, and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In regards to claim 7 lines 4-5, the phrase "a linear motor comprising at least one stationary member mounted on the platen and a moving member mounted on the unit base" is unclear. It is clear from line one of claim 7, that a component-feeding unit is carried on the unit base; however, it is uncertain how "a moving member" is also

Art Unit: 3724

mounted on the unit base. It is unclear how a moving member is mounted on the unit base and would interfere with a component-feeding unit

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 7, 8, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by 61-239696 (Japanese Patent). 61-239696 discloses the same invention including at least one unit base capable of carrying at least one unit (15), a platen for sliding the unit base (11), a linear motor comprising at least one stationary member mounted on the platen and a moving member mounted on the unit base (Fig. 2), and a heat dissipation portion formed on the unit base (23), and that the heat dissipation portion comprises a heat dissipation fin disposed parallel with a direction of sliding movement (23).

Response to Arguments

7. Applicant's arguments with respect to claims 7, 8, and 13 have been considered but are moot in view of the new ground(s) of rejection. In regards to heat dissipation portion of the 61-239696, it is old and well known that any type of fin-like structure projecting off of a base structure is capable of performing a heat dissipating function.
